

IIIIDILO LOUILD

BY EXPERIMENTS THE NUM BER OF ANIMALS AFFECT-ED BY DISEASE.

Proper Method Is To Confine th Dog and Await Developments

> In Order To Be Sure.

The epidemic of rabies which has existed in Indiana for the last five years is now more serious than for many months. From the beginning of August, 1911, the brains of 600 animals have been examined at the cows which was terribly bitten died Wenzler's. on the following day. The other thirteen cows died of typical rabies, the first one on the 23rd day and the last one on the 50th day after they were bitten. The heads of none of these thirteen cows were sent to the Shore train, was taken through here State Laboratory because the diagnosis was too clear to need verifica- The body was in charge of the tion. Hence these thirteen cases are Adams Express Co. not included in the 314 noted above.

It is impossible to estimate with any degree of accuracy the amount of stock killed and the number of persons bitten by rabid dogs in this state. Our records of persons bitten are very incomplete because hysicians and others who tsend eads to the Laboratory seldom give Colorado regiment during the Spanishmuch information about the doings of the dog. During last year 53 brigadier general of volunteers by persons were reported to have been pitten by dogs proved to have rabies. During the first nine months of 1911 at least 70 persons were bitten.

1911. 171 brains have been examined emy. 74 of which, or 43.2 per cent had rabies. One of these, was thebrain of an eight year old boy. In addition to the 74 mentioned, 3 positive cases were found at the Purdue Laboratory, all from Tippecanoe county. During the menth of June the family residence. only four cases of rabies were found among 27 brains examined. In July and August there were 20 eases found among fifty heads.

During the last three years the ty, celebrated her 102d birthday anniarea of greatest infection has shift. versary yesterday.

The bite zens, and it will take good care of a dog can transmit rabies from that the trust reposed in it in this one to five days before it shows any matter will not be abused. Nothing Commercial Club to land two symptoms of the disease. At this but concerns that are good will be stage it is virtually impossible to find Negri bodies (always an indication of rabies) because they are too minute and too few in number to be discovered with the microscope. Hence it is to the patient's advantage that the dog be confined and watched for a week or ten days.

If it remains healthy during this time, it is proved free from rabies by an even better test than the microscope could furnish. When the animal is killed at once, and the microscopist is unable to find Negri the guinea pig.

Saved His Mother's Life.

"Four doctors had given me up," writes Mrs. Laura Gaines of Avoca. La., "and my children and all my friends were looking for me to die. State Laboratory. Of these, 314, or when my son insisted that I use 52.3 per cent were proved to have Electric Bitters. I did so, and they rabies. This number probably does have done me a world of good. I not represent one-fourth of the cases will always praise them." Electric that have actually occurred in the Bitters is a priceless blessing to State. For instance, in May, 1910, a women troubled with fainting and dog appeared in Wayne county and dizy spells, backache, headache, bit 14 head of dairy cows. The dor weakness, debility, constipation or was killed and examination of its kidney disorders. OUTLOOK FOR APPLES.

Glowing Prospects Ahead For Intelligent Growers of Indiana

Fruit.

The members of the Indiana Horticultural Society who are promoting the State Apple Show for the week of Nov. 6, in Indianapolis, say that the revival of interest in orchards has been remarkable in the last few years. Large companies have been formed to invest in fruit lands, et ers are organizing to degoing in for the business of fruit growing on extensive scale, and in every old orchard which had been permitted to go to decay are being being started. There are signs everywhere that Indiana is moving up in the l'st of apple producing states, and this progress is expected to be still more marked as education is spread by the state Apple show and similar mediums.

The members of the society say time, but just as soon as they are that the day of the apple specialist all done, arrangements will be made is here. The old plea that pests and by the lot buyers for the drawing to diseases have ruined the orchards is take place and also arrange the plan not now accepted, because scientific by which the drawing will be made. research, the discovery of sprays and the invention of appliances have A number who did not want to placed in the hands of the grower buy lots have offered eash donations weapons that are driving out the orchard enemies and permitting the

It is evident, too, that apple grow ing as a business is starting anew on a substantial basis, with encourlaging marketing facilities available. Years ago the orchard was only a sideline to general farming. Now that kind of business that little on Tuesday and completed the work many men and companies are maked considerably. At the present could be done at it. However, a by Saturday noon. Everybody is ing apple growing their chief source of revenue, and the growers have found it possible to reap goodly profits where they follow cultural and marketing methods along intelligen lines. Not only are farm people going in fer apple production with assurances that fruit of high quality will always find a ready demand, but the business is proving an attractive field of investment for city people

Everywhere the dd discouraging conditions are giving away to toptimism and diligent study of orchard questions. That this revival of interest prevails, with glowing presents for the future, is evident Money to loan on Farms a specialty at Purdue University, at Lafavette. where the horticultural department now has more inquiries on sprays in week than four years ago were rethree good concerns in Plymouth or ceived in a month. Manufacturers of spray pumps say that last spring per Ball stated this morning that heir sales in Indiana were from 50 the club had already at least twenty- to 500 percent greater than for the same period last year.

The success of growers in the tied until it gets some money with Pacific northwest has been a factor which to talk business to these in quickening the interest here in Indiana. Another has been the steady increase in the apple eating habit of both town and country people, and altogether the present holds bright promise to orchard owners where they are learning to mar-

HUMAN HAIR ROOT

Showing Dandruff Germs At Work

Kills the Dandruff Germ and Makes the Hair Grow

Restores Gray Hair to Natural Color

FEW people are aware of the number of Dandruff Germs that infest the human hair and scalp. The germs which locate themselves in the follicle or sack which envelopes the root of the hair, spend a lazy existence in sucking up the juices which should go to keep life and strength in the hair. These germs cannot be seen by the naked eye, but with a magnifying glass of from 300 to 400 diameters the spores of this hair destroyer may be seen in masses, clinging to the hair.

DANDRUFF, ITCHING OF .THE SCALP AND FALLING HAIR ARE A SURE SIGN OF DESTRUCTIVE GERMS.

Wyeth's Sage and Sulphur Hair Remedy not only kills the dandruff germs and prevents baldness, but it also restores faded and gray hair to natural color.

Don't Experiment With Old Fashioned Hair Dyes but save your hair and restore it to natural color and luxuriance by using Wyeth's Sage and Sulphur Hair Remedy.

Druggists are authorized to sell Sage and Sulphur under guarantee that the money will be refunded if it fails to do exactly as represented.

PRICE 500 AND \$1.00 AT ALL DRUGGISTS If your druggist does not keep it send 50c. in stamps and we will send you a large bottle, express prepaid. WYETH CHEMICAL COMPANY, 74 CORTLANDT STREET, NEW YORK
